2、Peace Cup Golf Tournament: a brand mode promoting peace, sports and public charity for transnational enterprises

On November 23, an NGO delegation headed by the foundation attended an international forum on peace and sports in Monaco. Sports ministers from various countries, international athletics and Olympic champions accepted the invitation extended by the foundation and became its peace ambassadors. It was decided that the forum which has received special authorization due to its great leverage in international peace and sports, will take place in China in 2018.

The fact that sports can bridge distance between people, end discrimination against nations and religions and prevent prejudice, fear and misunderstanding makes us believe that peace can be secured by sports. As a universal language, sports can easily remove the barriers between people, and it symbolizes the relentless pursuit of peace and friendship by the human being.

As sports play a leading role in improving investment environment, fostering international cooperation, narrowing economic gaps and alleviating poverty and financial difficulties, the foundation has been, for 17 consecutive years, collaborating with Beijing Association of Foreign Investment Enterprises, Beijing People's Association for Friendship with Foreign Countries, Beijing Non-Governmental Organizations International Exchange Association and Capital Service and Trade

Association in reviving the Olympic spirit and developing the Belt and Road initiative with the concept of Peace+1. The 17th International Golf Tournament launched on October 14th in Beijing witnessed over 100 foreign ambassadors, transnational business heads, NGO representatives and public figures from 31 countries showing their love and support to venerable groups through donation and charity auction, with all incomes being directed to children living with autism in Beijing.
